CHAIRMAN'S MESSAGE

Manateq has developed a lot since its establishment 12 years ago. It has stayed true to its vision of enhancing Qatar's economic diversification by providing integrated infrastructures within strategically placed zones and creating a world-class business environment that enables companies to provide value-added products and services to the local and foreign markets.

Manateq has succeeded in building a sustainable asset portfolio for the nation that includes a group of industrial zones and logistics parks which now spans over 80 million square metres across 12 zones. It has also developed a total of 3.4 million square meters of warehousing solutions in partnership with the private sector. The strategically located zones create an end-to-end solution for manufacturers, exporters, and service sector operators, to maximise their business potential and make Qatar their base for local, regional, and global trade.

However, land zones are not a compelling proposition in themselves. Much more is needed to stand ahead of the fierce regional and global competition for business partners. We understood that to succeed, to build a sustainable foundation for the nation's economic diversity and live up to our standing as a key development pillar of the Qatar National Vision 2030, we needed to back up hard assets with the persuasive power of compelling service. This customer-centric approach is driven by values of efficiency, collaboration, service excellence, sustainable development, and transparency, and we are always keen to adhere to our goals, mission, vision and values as the basic pillars of Manateq.

Mohammed Al Malki

Chairman

CEO'S MESSAGE

Manateq contributes to economic diversification by developing and enhancing the industrial and logistics sectors. This is achieved through providing wide-ranging solutions tailored to market needs, offering various zones in strategic locations close to ports and international airports. They provide an outstanding business environment that offers comprehensive solutions for manufacturing companies, exporters, and service providers, enabling them to develop their businesses and achieve their goals. At Manateq, we work to build a sustainable foundation for economic diversification in the country by developing logistics parks, industrial zones, open yards, and warehousing parks to serve as catalysts for economic diversification and sustainable development in the State of Qatar.

Through our commitment to providing advanced and specialized services, we at Manateq always strive to meet the needs of our partners at the highest levels of quality and efficiency. We are committed to innovation and continuous development, and we endeavour to provide an integrated work environment that supports project operations and facilitates access to local and global markets, thereby contributing to their growth and expanding their business scope.

Mohammed Al Emadi

Chief Executive Officer

OVERVIEW

We are a catalyst for change; a national initiative working to diversify Qatar's economy through the provision of world-class infrastructures within strategically placed economic zones.

Established in 2011, Manateq is positioned as a vital component in achieving the «Economic Development» pillar of the Qatar National Vision 2030.

We realise that long-term and sustainable economic growth can only be accomplished through a thriving private business sector, capable of competing globally, and that the nation must now think beyond the current upcoming projects, such as the 2022 World Cup, to the establishment of non-oil related industries. To this end, the emphasis is now on the creation of a solid infrastructure in which small and medium-sized enterprises (SMEs) can prosper and grow.

To ensure this kind of longevity, it is essential that we have the investment, expertise, and entrepreneurial culture necessary. Manateq is therefore mandated to establish a wider range of business sectors in the economy, by developing indigenous enterprises in these sectors whilst also attracting international investment, businesses, and partners.

We work with potential and existing, local and foreign, partners; providing an international gateway for the swift set-up and successful growth of your business in Qatar.

Our personalized and comprehensive client engagement and support services ensure that establishing your operations here is made simple, and with our diverse range of land and property solutions, there are plenty of reasons to make the move.

The Logistics Parks, Industrial Zones and Warehousing Parks offer our partners a range of client services, unparalleled interconnectivity, access to GCC and global markets, high quality infrastructure, an easy set-up process, and much more.

OUR VISION

To enhance the economic diversification by enabling our partners to deliver value-added products and services to the markets.

OUR MISSION

To create a world-class business environment by operating the industrial zones and logistics parks in the State of Qatar.
